

Project Bulletin

Millcreek Church

Project

To design and build a 10,400 sq. ft. church, capable of seating 300 to 400 people.

Project Details

The building site was located in Millcreek, Washington. The appearance of the structure had to blend in with the adjacent, newly constructed housing community.

Time to Complete

Construction was started May 1, 2001 and the building was completed December 15, 2001.

Special Features

This structure utilized panelized wall construction. This reduced the time spent erecting exterior and interior walls on-site, therefore, saving time and money. The sanctuary has a 15' high vaulted ceiling, the foyer has a 13' vaulted ceiling and the rest of the building has 9' ceilings.

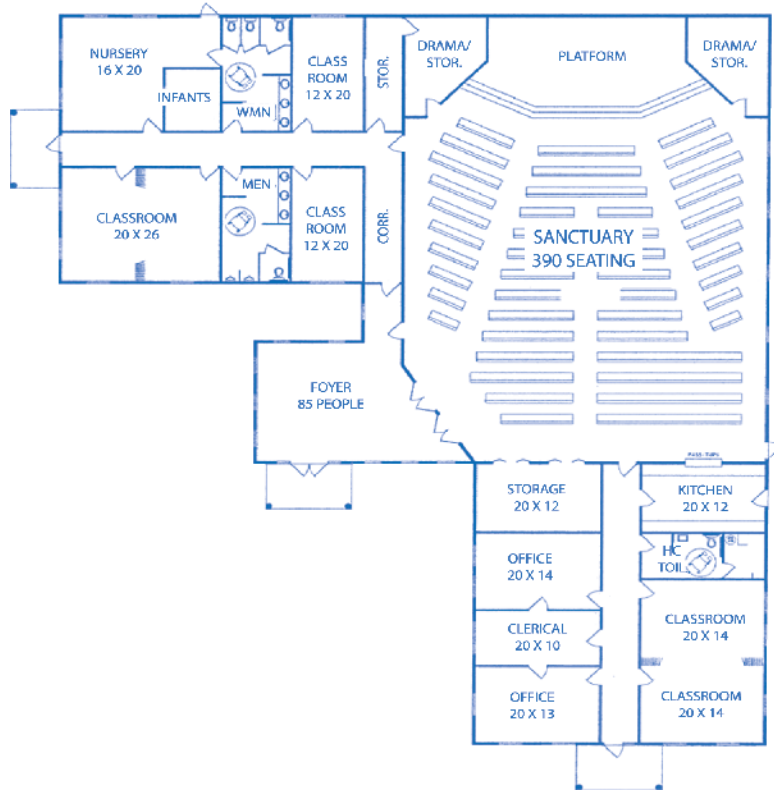

Millcreek Church

PO Box 1404
Chehalis WA 98532-0350

Features:

- 10,400 sq.ft.
- church/administration area
