

Project Bulletin

Stone & Webster Job Site Offices

Project

Rental of five job-site offices for a three-year project.

Project Details

The construction site is located in Centralia, Washington. The job-site offices are nestled between two-rows of huge cooling towers (at a nearby power plant).

Time to Complete

The first building delivered was a 8' x 12' skid-mounted office on January 15, 2000. Four additional job-site offices were delivered between January and April 15, 2000.

Special Features

The client wanted cost-effective, clean buildings that required minimal service. All of these rental offices include built-in heat pumps (heating/air-conditioning), steel doors, 8' interior ceilings plus aluminum steps with railings.
