

## Project Bulletin

### *Trans Alta*

#### Project

To supply approximately 25 job-site offices for new power plant construction.

#### Project Details

The building site was located in Centralia, Washington. The client needed a wide variety of offices from guard shacks to doublewides.

#### Time to Complete

Most buildings were delivered within one to two days of the initial request.

#### Special Features

A number of the doublewides were installed on hillsides requiring special blocking. Provided self-contained restroom units (placed inside buildings).
